Alcohol Level :	12,0 % vol.	
Acidity Level :	5,7 g/lt	pH : 3,28
Sugar :	1,2 g/l	
Volume of Bottle :	750 ml	

Description of wine, vineyards, winemaking etc. :

Repositioning Retsina Wine (Appellation by Tradition) in a new quality context, we have meticulously selected grapes of Roditis variety which grow on the hills surrounding Nemea, in Corinthos.

Combining these low-yield grapes with state-of-the art wine – making technology, and a carefully calculated quantity of resin from the Pinus halepensis variety of pine tree, we succeed.

The result is a refreshing wine balanced perfectly between pine and grapes, its citrus expression co-existing with its aromatic pine resin on equal terms. Our retsina, RITINITIS, harmonizes with the beloved and far from typical Greek menu. RITINITIS is best enjoyed at approximately 8°C.
