VINEYARDS

Entirely sustainable and certified organic vineyards at an altitude of 250m in the uplands of Theopetra and the surrounding area of Meteora. 15-20 year old vines.

SOIL

Sandy clay with limestone.

CLIMATE

The mesoclimate of the region is continental, with rainy cold winters and sunny, hot and dry summers. The high diurnal temperature range during spring and summer allows intense and complex flavors to develop and slow maturation retaining high levels of acidity.

VINIFICATION

Controlled fermentation and aging of organically grown grapes in French and American oak barriques for 12 months.

SERVING SUGGESTIONS

Pairs well with spicy red meat, dishes with tomato sauces and rich cheese.

TASTING CHARACTERISTICS:

Fruity aromas of blackberry, plum and sour cherry. Spicy aromas of black pepper, cloves. Sweet aromas of chocolate, caramel and nuts

Full, round body with balanced acidity and rich, velvet tannins
