### VINEYARDS

Family-owned organic vineyards in the upland region of Mantinia, Arcadia, Greece. 650m altitude.

### SOIL

Clay and sand.

### CLIMATE

As a result of high elevations, the climate in Mantinia is more continental than Mediterranean. This is one of the coldest wine-growing regions in Greece, despite its relatively low latitude. Cool temperatures during summer slow ripening sufficiently for the grapes to retain their characteristic acidity, and harvest can sometimes come as late as October.

### HARVEST

September, hand harvested.

### VINIFICATION METHOD

After careful vinification of the organically grown grapes from the Domaine Spiropoulos vineyards, the still base wine is transferred in to special sealed pressure tanks and a second alcoholic fermentation is initiated with a special mix of yeast and sugars. As the tank is sealed, the CO<sub>2</sub> produced during this second fermentation cannot escape and is thus trapped in the wine as delicate, smooth bubbles.

### SERVING SUGGESTIONS

Ideal accompaniment for appetizers, sweets and fruits.

### TASTING CHARACTERISTICS:

Rich, aromatic bouquet of roses and citrus fruits

Intense aftertaste
