VINEYARDS

Fourth generation family-owned vineyards located in Chania, on the beautiful Mediterranean island of Crete, Greece. Wholly sustainable farming practices.

SOIL

Inclined limestone and clay fields at an altitude of 250 meters.

CLIMATE

Slightly lower temperatures than average for the Mediterranean, adequate rainfall during winter, a warm summer and the presence of a cooling sea breeze which benefits the vineyard during summer days.

HARVEST

Late August and September

VINIFICATION METHOD

Grapes are harvested early in the morning and carefully sorted, de-stemmed and crushed. Fermentation takes place with skin contact in inox tanks for 10-12 days at a controlled temperature of 25-28C. Every two hours the pulp is rinsed with grape juice for superior extraction.

SERVING SUGGESTIONS

Pairs well with cheese and meat.

TASTING CHARACTERISTICS:

Soft texture

Aromas of plum, mandilari and jam
